

Environment Tag

BLE Edition

Next-Generation Asset Tracking for Accurate Location and Sensing.

KEY FEATURES

Feature & Benefits

- Peel-n-stick or screw mountable
- Industrial-grade, IP66 rating
- Operates reliably from -40°C to 70°C
- 5+ years battery life at room temperature
- Long-range BLE (100m+)
- Remote firmware update
- LED indicator
- Dedicated Bluetooth 5.x Chipset

Sensor Array

- Temperature: $\pm 0.3^{\circ}\text{C}$
- Humidity: 1%
- Accelerometer: $\pm 16\text{ g}$
- User push button

The Assetflo Temperature Tag is a cutting-edge asset tracking device that provides accurate monitoring of location, temperature, and humidity in indoor and outdoor settings. Equipped with a high-precision sensor and Bluetooth Low Energy (BLE) 5.1 technology, it enables reliable tracking of food, pharmaceuticals, and equipment.

This compact device is suitable for various industries. It features adaptive motion sensing and a long-lasting battery. For applications requiring complete traceability, it can also be calibrated to NIST standards.

Applications & Use Cases:

- ✓ Pharmaceutical and food tracking
- ✓ Indoor Asset Tracking
- ✓ Real-time Location System - RTLS
- ✓ Asset and Equipment Utilization
- ✓ Smart Facility - Warehousing

Ideal for the pharmaceutical, food, logistics, and warehousing industries.
